

#	Authors	Title
1	Andrey Zyatchin	Collaborative transportation as networking game
3	Jung You	Optimality of the Uniform Rule
4	Simon Hoof	Dynamic Voluntary Provision of Public Goods: The Recursive Nash Bargaining Solution
5	Nicolas Klein	Learning in a Game of Strategic Experimentation With Three-Armed Exponential Bandits
6	Victor Rozen	Some approaches to value concept in games with ordered outcomes
7	Alexander Sidorov, Mathieu Parenti and Jacques-Francois Thisse	Bertrand meets Ford: Is this for Good or for Bad for Consumers?
8	Eric Hoffmann and Anne-Christine Barthel	Rationalizability and Learning in Games with Strategic Heterogeneity
9	Nikolay Krasovskii and Alexander Tarasyev	Equilibrium Trajectories in Dynamical Bimatrix Games with Discounted Integral Payoffs
10	Anton Bondarev	Cooperative vs. non-cooperative approach to differential R&D game: Endogenous uncertainty as the new market inefficiency source
11	Dominik Welter and Stefan Napel	Responsibility-based allocation of cartel damages
12	Valery Vasilev	Fuzzy core equivalence in multi-regional economic systems
13	Taisiia Plekhanova, Ekaterina Gromova, Anna Kirpichnikova and Stewart Blakeway	Pareto-optimal solution in a dynamic game on a MANET
14	Alexander Vasin, Valentin Kirillov and Anastasiia Divtsova	Conditions for stable agreement on limitation of transboundary atmospheric pollution
15	Jimmy Teng	Schelling Point as a Refinement of Nash Equilibrium
16	Masaki Miyashita	Binary Collective Choice with Multiple Premises
17	Duoze Li and Quan Wen	Decentralized Network Bargaining with Endogenous Matching
18	Ekaterina Gromova, Anastasiya Malakhova and Arsen Palestini	Payoff distribution in a multi-company extraction game with uncertain duration
19	Ryo Kawasaki, Hideo Konishi and Junki Yukawa	A Finite Bottleneck Game with Homogeneous Commuters
20	Olga Kuznetsova and Natalia Dodonova	Research of decision making model for allocation scarce resources in business games
21	Pavel Konyukhonskiy, Alexandra Olkhovik and Anna Kuznetsova	Game-theoretic modeling of higher education development in the situation of economic recession
22	Henrique Zaidan and Claudio Cristiano	Extended Warranty: An Approach via Stackelberg Game
24	Elena Parilina and Vladimir Bure	Stochastic Models of Data Transmission with Specific Network Topologies
25	Nir Vulkan and Sabrina Artinger	Does group size matter for behavior in online trust dilemmas?
26	Natalia Naumova	Reactive bargaining sets for games with restricted cooperation
27	Natalia Nikolchenko and Anastasia Lebedeva	Integrative Approach to Supply Chain Collaboration in Distribution Networks: Impact on Firm Performance

28	Natalia Aizenberg, Igor Bykadorov and Sergey Kokovin	Beneficial welfare impact of bilateral tariffs under monopolistic competition
29	Olga Gorbaneva and Guennady Ougolnitsky	Static game theoretical coordination models of private and public interests in economic systems
30	Ovanes Petrosian and Maria Nastych	Looking Forward Approach in Cooperative Differential Games with Non Transferable Utility
31	Ekaterina Rzhetskaya	Problem of connectivity in some graph searching problems
32	Anatolii Kleimenov	An approach to the construction of solutions of the non-antagonistic positional differential game.
33	Yu Chen	On the Equivalence of Bilateral and Collective Mechanism Design
35	Igor Bykadorov, Andrea Ellero, Stefania Funari, Sergey Kokovin and Pavel Molchanov	Negative Pro-Competitive Effects of Trade under Monopolistic Competition
36	Andrei Orlov	Global optimization approach to hexamatrix games
37	Sukhee Batbileg, Natsagdorj Tungalag, Evgeniya Finkelstein, Alexander Gornov and Anton Anikin	Four-Person Game and Its Application in Economics
38	Enkhbat Rentsen, Batbileg Sukhee, Tungalag Natsagdorj, Alexander Gornov and Anton Anikin	Global Optimization Approach to Nonzero Sum N-Person Game
39	Anna Khmelnitskaya, Dolf Talman and Guang Zhang	The average tree value for graph games with main players and application to hub and spoke models
40	Sergei Onenko and Sergei Kokovin	Equilibrium existence in Krugman's trade model
41	Dmitrii Lozovanu and Stefan Pickl	On the Existence of Stationary Nash Equilibria in Finite State Space Average Stochastic Games
42	Elena Lezhnina, Victor Zakharov and Viacheslav Shirokih	Coalition-formation problem for Cooperative Inventory Routing Game
43	Anna Khmelnitskaya, Gerard van der Laan and Dolf Talman	Centrality rewarding Shapley and Myerson values for undirected graph games
44	Shraman Banerjee and Bo Chen	Asymmetric Dynamic Price Mechanism for Symmetric Buyers
45	Marko Budler and Peter Trkman	Game-theoretic reasoning in business model approach to supply chain management
46	Swagata Bhattacharjee	Contracting for Innovation under Ambiguity
47	Nina Subbotina and Evgenii Krupennikov	Solutions of inverse problems in nonantagonistic differential games
48	Varvara Spirina	The game theory application in commercial property management
49	Victoria Kreps and Misha Gavrillovich	Decoding linear error-correcting codes. Application to games with incomplete information on both sides.
50	Denis Fedyanin	On information control in dynamic epistemic logic game found by reflexing methods
52	Ekaterina Kolpakova	A construction of Nash equilibrium based on system of Hamilton-Jacobi PDEs of special type

53	Yurii Averboukh	Near optimal strategy for many agent control problem with mean field interaction
54	Igor Shevchenko	Strategies to minimize catch distance to the real target
55	Alexander Krylatov, Anastasiya Shirokolobova and Victor Zakharov	Dual formulation of competitive traffic assignment problem
56	Vladislav Taynitskiy and Elena Gubar	Impulse control in bi-virus epidemic models.
57	Thomas Weber	Quantifying Commitment in Nash Equilibria
58	Elena Gubar, Suriya Kumacheva and Ekaterina Zhitkova	Evolution of risk-statuses in a model of tax control
60	Vsevolod Korepanov	Experiments on the influence of strategic thinking models on resource allocation mechanisms
61	Anastasiia Ivakina and Nikolay Zenkevich	Supply network working capital coordinating model
63	Igor Asanov and Simone Vannuccini	Short- and Long-run Effects of External Interventions on Trust
64	Dmitry Khlopin	On Tauberian theorems and game value maps
65	Chiu Yu Ko and Duoche Li	Decentralized One-to-Many Bargaining
66	Anna Rettieva	Equilibria in Discrete-Time Dynamic Multicriteria Games with Finite Horizon
67	Jinhui Pang and Ping Zhu	The cores for k -additive fuzzy games with fuzzy preferences by concave integral
68	Deepal Basak and Zhen Zhou	Diffusing Coordination Risk
69	Denis Kuzyutin, Maria Nikitina and Irina Marchenko	Sustainable cooperation in multistage multicriteria games: the "Imputation Distribution Procedure" approach
70	Erfang Shan and Nana Xie	The position value on hypergraph councination situations with weight structure
71	Claudia Meroni and Francesco De Sinopoli	A concept of sincerity for combinatorial voting
72	Giovanni Reyes and Gabriel Turbay	"Equity and Democracy: A Mathematical Approach based on Individual and Coalitions' Preferences"
73	Aleksei Kondratev	Nash-stable Community Structures in Collaborative Network
74	Nikolay Korgin	Incentive compatibility of Nash mechanisms
75	Nikolay Bazhenkov, Maria Kuznetsova and Marina Sandomirskaja	Who competes with whom in the Internet: analysis of price dispersion
76	Gabriel Turbay	Auction Equilibrium in Coalition Formation and a General Solution for the triangular 3-Person Cooperative Game
77	Yulia Ibragimova and Fedor Sandomirskiy	Dynamic Coalition Formation on the Bitcoin Market
78	Julia Chirkova	Virtual Operators Competition in the Two-sided Market
79	Peter Duersch, Marco Lambrecht and Joerg Oechssler	Measuring skill and chance in games
80	Mikhail Lutsenko	Agents against the center
81	Jose Daniel Lopez-Barrientos, Beatris Adriana Escobedo-Trujillo and Hector Jasso-Fuentes	Blackwell-Nash equilibria in zero-sum stochastic differential games

82	Konstantinos Papadopoulos and Chariklia Dermentzi	The Make or Buy Decision with Horizontal Outsourcing
83	Vladimir Matveenko, Alexei Korolev and Maria Zhdanova	Game equilibria and dynamics of unification in production networks with nonhomogeneous players
84	Nikolaos Kakogiannis, Nikolaos Chrysanthopoulos and Georgios Skiadopoulos	Optimised Building Energy Saving Measurements
85	Rajani Singh and Agnieszka Wiszniewska-Matyszkiewicz	Linear quadratic game of exploitation of common renewable resources with inherent constraints
86	Andrei Gurtov, Andrey Lukyanenko and Vladimir Mazalov	Virtual operator market as a congestion game
