GSOM Library Printing Tips

The screenshot displays the PrintingInfo web application interface. The top navigation bar includes the site name 'PrintingInfo' and a search bar. The main content area is divided into three sections: 'User information', 'Printing history', and 'User Jobs'. Each section has a corresponding label box highlighting its title. The 'User information' section shows details for user 'Мулера Юлия', including her F.I.O., department, card number, email, and balance. The 'Printing history' section shows a table with columns for file, date, page count, and cost, but it is currently empty. The 'User Jobs' section also shows an empty table with columns for date, page count, and document.
